-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to the preliminary amendment of June 28, 2001.
2. ☒ The allowed claim(s) is/are 15-44.
3. ☒ The drawings filed on 28 June 2001 are accepted by the Examiner.
4. ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

DETAILED ACTION

Allowable Subject Matter

Claims 15-44 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 15 and 30, which include an objective lens system with the recited three lenses where the curvature center of the spherical surface of the second lens is at a distance shorter than 15% of the curvature radius of the spherical surface of the second lens from the center of the aperture stop and where the aperture stop is arranged at a distance shorter than 25% of the focal length of the first lens from the focal point of the first lens.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Betensky (US 5,900,993), cited by Applicant, has a three lens structure shown, for example, in Fig. 2A (data in Table 2). The second numerical condition "where the aperture stop is arranged at a distance shorter than 25% of the focal length of the first lens from the focal point of the first lens" is met by Betensky (Table 7 shows f_1 in Example 2 to be equal to 92.6; the aperture stop is arranged at a distance shorter than 25% of 92.6). However, the first condition, "where the curvature center of the spherical surface of the second lens is at a distance shorter than 15% of the curvature radius of the spherical surface of the second lens from the center of the aperture stop" is not found in Betensky, since the curvature center of the spherical surface of the second lens is at a distance greater than 15% of the curvature radius of the spherical surface of the second lens from the center of the aperture stop. (In Table 2, 15% of 5.478497, 0.8205 is not less than the calculated distance, approximately 2.35). The references cited by the Examiner, Clark et al, Igarashi, Doi et al and Taira are all cited to show objective lens systems having some similar structure, but do not meet the recited numerical relationships.
